

Python programming 1

We are using 2 platforms for this:

code club

<https://projects.raspberrypi.org/en/pathways/python-intro>

And trinket

<https://trinket.io/>

To set yourself up, open both of these websites in separate browser tabs.

Create an account for yourself in each, and be sure to remember the password.

Code club

<https://projects.raspberrypi.org/en/pathways/python-intro>

has a series of exercises which lead you through python programming from the beginning. These exercises come with badges and quizzes allowing you to test your knowledge as you learn.

Trinket

<https://trinket.io/>

is a website that lets you edit python programs and run them in the same window. It also lets you save your work, and share it with other people, which will help if you get stuck (you can share it with robot club helpers).

CHALLENGE ONE

Getting started

BRONZE:

Start the hello world project (which uses lots of emoji)

<https://projects.raspberrypi.org/en/projects/hello-world/>

When you have your project showing

share it with one of the robot club helpers to check it works (and you can share things).

CHALLENGE ONE

Numbers, dates and randomness

SILVER :

Complete “Sums and Dates”, and then “Roll a Dice”.

Share your project again

CHALLENGE ONE

Questions and answers

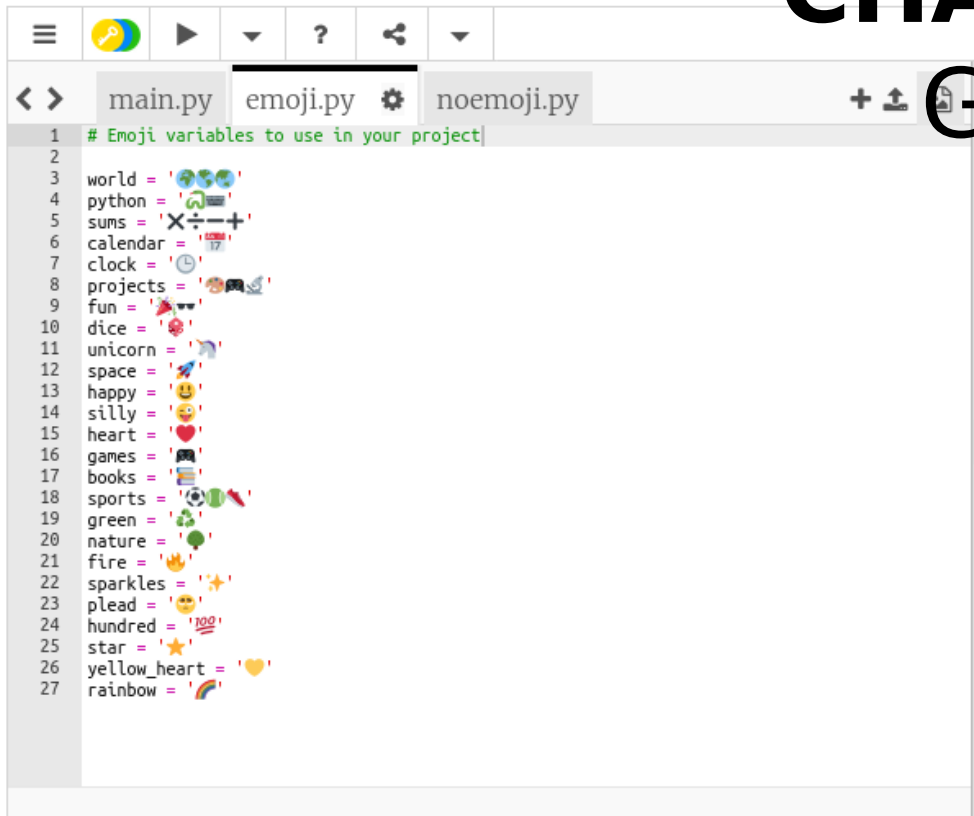

GOLD :

Complete “Sentence starter”, and then do the quiz.

Well done, you’ve done the basics... now to take it further!

CHALLENGE TWO

Going further

```
1 # Emoji variables to use in your project
2
3 world = 🌍🌍🌍
4 python = 🐍
5 sums = ✖➗✚✛
6 calendar = 📅
7 clock = 🕒
8 projects = 📁📂
9 fun = 🎉🎊
10 dice = 🎲
11 unicorn = 🦄
12 space = 🚀
13 happy = 😊
14 silly = 😜
15 heart = ❤️
16 games = 🎮
17 books = 📖
18 sports = ⚽🏈
19 green = 🌿
20 nature = 🌳
21 fire = 🔥
22 sparkles = ✨
23 plead = 🙏
24 hundred = 💯
25 star = ⭐
26 yellow_heart = 🟡
27 rainbow = 🌈
```

- Add more emoji to emoji.py
- Write some code which uses your new emoji
- Look at noemoji.py – can you work out how to incorporate that into your code?
- Can you make your code compliment people?
- How about a random compliment generator with emoji?
